A NOTES FORMING PART OF THE FINANCIAL STATEMENTS

1 Corporate information

Mush Textile Pvt. Ltd. ("the Company") was incorporated as a private limited company in India under the Companies Act, 2013 in 2018 bearing CIN - U17303GJ2018PTC101321. The Company's registered office is situated at Plot No 4 and 5, RCC Shed, Block/Survey No 986, Paldi Kankaj Ahmedabad, Gujarat. The Company is into manufacturing of fibrous products and trading of the same. The company operates from Ahmedabad, Delhi and Karnataka.

2 BASIS OF ACCOUNTING AND PREPARATION OF FINANCIAL STATEMENTS

2.1 Statement of Compliance

The financial statements have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under Section 133 read with Rule 4A of Companies (Indian Accounting Standards) Rules, 2015 and the relevant provisions of the Companies Act, 2013.

The financial statements are presented in Indian Rupee ('INR'), which is also the functional currency of the company.

The company's material accounting policies are included in Note 2.3 to 2.20.

2.2 Basis of preparation and presentation

These financial statements have been prepared in accordance with Indian Accounting Standards (Ind AS) under the historical cost convention on the accrual basis except for certain financial instruments which are measured at fair values, the provisions of the Companies Act, 2013 ('Act'). The Ind AS are prescribed under Section 133 of the Act read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015, as amended.

The Company has adopted all the Ind AS standards and Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

Functional and presentation currency

These financial statements are presented in Indian Rupees (INR), Million, which is also the Company's functional currency. All amounts have been rounded-off to the nearest INR, unless otherwise indicated.

Historical cost convention

Historical cost is generally based on the fair value of the consideration.

Basis of measurement

The Standalone Financial Statements have been prepared on the historical cost basis except for the following items:

Items	Measurement basis
Certain financial assets and liabilities	Fair value
Equity-settled share-based payment arrangements	Fair value

Significant accounting judgments, estimates and assumptions

The preparation of financial statements in conformity with Ind AS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses and the accompanying disclosures. Uncertainty about the assumptions and estimates could result in outcomes that require in material adjustment to the carrying value of assets or liabilities affected in future periods.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively.

Assumption and estimation uncertainties

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial Statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment are included in the following notes:

- Note B4 : Recognition of DTA, availability of future taxable profit against which tax losses carried forward can be used.
- Note B35 : Measurement of defined benefit obligations: key actuarial assumptions.

Shard

Measurement of fair values

Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

When measuring the fair value of an asset or a liability, the company uses observable market data as far as possible. If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

Further information about the assumptions made in measuring fair values is included in the following notes:

- Note B30 - Fair value measurements

Current and non-current classification

The Company presents assets and liabilities in the balance sheet based on current / non-current classification.

An asset is classified as current when it satisfies any of the following criteria:

- it is expected to be realized in, or is intended for sale or consumption in, the Company's normal operating cycle.
- it is held primarily for the purpose of being traded;
- it is expected to be realized within 12 months after the reporting date; or
- it is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least 12 months after the reporting date.

A liability is classified as current when it satisfies any of the following criteria:

- it is expected to be settled in the Company's normal operating cycle;
- it is held primarily for the purpose of being traded;
- it is due to be settled within 12 months after the reporting date; or
- the Company does not have an unconditional right to defer settlement of the liability for at least 12 months after the reporting date. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

Current assets/liabilities include current portion of non-current financial assets/liabilities respectively. All other assets/ liabilities are classified as non-current. Deferred tax assets and liabilities are classified as non-current assets and liabilities.

Operating cycle

Based on the nature of the operations and the time between the acquisition of assets for processing and their realization in cash or cash equivalents, the Company has ascertained its operating cycle as twelve months for the purpose of current non-current classification of assets and liabilities

The material accounting policies are set out below:

2.3 Revenue Recognition

Revenue from contracts with customers is recognised upon transfer of control of promised goods/ services to customers at an amount that reflects the consideration to which the Company expect to be entitled for those goods/ services.

To recognize revenues, the Company applies the following five-step approach:

- Identify the contract with a customer;
- Identify the performance obligations in the contract;
- Determine the transaction price;
- Allocate the transaction price to the performance obligations in the contract; and
- Recognise revenues when a performance obligation is satisfied.

Revenue from Sale of goods

Revenue towards satisfaction of a performance obligation is measured at the amount of transaction price (net of variable consideration) allocated to that performance obligation. The various discounts and schemes offered by the Company as part of the contract.

Goods and Service Tax (GST) is not received by the Company in its own account. Rather, it is tax collected on value added to the commodity by the seller on behalf of the government. Accordingly, it is excluded from revenue.

Contract balances

The Policy for Contract balances i.e. contract assets, trade receivables and contract liabilities is as follows:

a. Contract assets and trade receivables

The Company classifies its right to consideration in exchange for deliverables as either a receivable or as unbilled revenue. A receivable is a right to consideration that is unconditional upon passage of time. Revenues in excess of billings is recorded as unbilled revenue and is classified as a financial asset where the right to consideration is unconditional upon passage of time. Unbilled revenue which is conditional is classified as other current asset. Trade receivables and unbilled revenue is presented net of impairment. Refer to accounting policies of financial assets in financial instruments – initial recognition and subsequent measurement.

b. Contract liabilities

A contract liability is the obligation to deliver services to a customer for which the Company has received consideration or part thereof (or an amount of consideration is due) from the customer. If a customer pays consideration before the Company deliver services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contract liabilities are recognised as revenue when the Company performs under the contract.

Interest Income-

Recognition of interest income or expense

Interest income or expense is recognised using the effective interest method.

The 'effective interest rate' is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to:

- the gross carrying amount of the financial asset; or
- the amortised cost of the financial liability.

In calculating interest income and expense, the effective interest rate is applied to the gross carrying amount of the asset (when the asset is not credit-impaired) or to the amortised cost of the liability. However, for financial assets that have become credit-impaired subsequent to initial recognition, interest income is calculated by applying the effective interest rate to the amortised cost of the financial asset. If the asset is no longer credit-impaired, then the calculation of interest income reverts to the gross basis.

2.4 Property, plant and equipment ('PPE')

Property, plant and equipment are stated at cost, less accumulated depreciation and impairment, if any. Costs directly attributable to acquisition are capitalized until the property, plant and equipment are ready for use, as intended by management. Other incidental expenditure attributable to bringing the fixed assets to their working condition for intended use are capitalized. Subsequent expenditure relating to fixed assets is capitalised only if such expenditure results in an increase in the future benefits from such asset beyond its previously assessed standard of performance. The Company depreciates property, plant and equipment over their estimated useful lives using the written-down value method.

Depreciation is recognised so as to write off the cost less their residual values over their useful lives, using the written-down method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

The management believes that these estimated useful lives are realistic and reflect fair approximation of the period over which the assets are likely to be used.

The estimated useful life considered for the assets are as under.

Category of assets	Number of years
Office equipment	5
Leasehold improvement*	5
IT Equipments	3

Depreciation method, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate.

Depreciation on additions (disposals) is provided on a pro-rata basis i.e. from (upto) the date on which asset is ready for use (disposed of).

*Leasehold Improvements are amortised over a period of lease or useful life whichever is lower.

2.5 Intangible assets

Intangible assets are stated at cost less accumulated amortization and impairment. Intangible assets are amortized over their respective individual estimated useful lives on a written down basis, from the date that they are available for use. The estimated useful life of an identifiable intangible asset is based on a number of factors including the effects of obsolescence, demand, competition, and other economic factors (such as the stability of the industry, and known technological advances), and the level of maintenance expenditures required to obtain the expected future cash flows from the asset. Amortization methods and useful lives are reviewed periodically including at each financial year end.

2.6 Financial instruments

I Initial recognition

Financial assets and financial liabilities are recognised when an entity becomes a party to the contractual provisions of the instruments.

All financial assets and liabilities are recognized at fair value on initial recognition, except for trade receivables which are initially measured at transaction price. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities, that are not at fair value through profit or loss, are added to the fair value on initial recognition. Regular way purchase and sale of financial assets are accounted for at trade date.

II Subsequent measurement

a. Non-derivative financial instruments

i. Financial assets carried at amortised cost

A financial asset is subsequently measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

ii. Financial assets at fair value through other comprehensive income

A financial asset is subsequently measured at fair value through other comprehensive income if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. The Company has made an irrevocable election for its investments which are classified as equity instruments to present the subsequent changes in fair value in other comprehensive income based on its business model. Further, in cases where the Company has made an irrevocable election based on its business model, for its investments which are classified as equity instruments, the subsequent changes in fair value are recognized in other comprehensive income.

iii. Financial assets at fair value through profit or loss

A financial asset which is not classified in any of the above categories are subsequently fair valued through profit or loss.

iv. Financial liabilities

Financial liabilities are subsequently carried at amortized cost using the effective interest method, except for contingent consideration recognized in a business combination which is subsequently measured at fair value through profit and loss. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

III Derecognition of financial instruments

Financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the company neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset.

If the Company enters into transactions whereby it transfers assets recognised on its balance sheet, but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the Company's continuing recognition of the assets.

Financial liabilities

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire.

The Company also derecognises a financial liability when its terms are modified and the cash flows under the modified terms are substantially different. In this case, a new financial liability based on the modified terms is recognised at fair value. The difference between the carrying amount of the financial liability extinguished and the new financial liability with modified terms is recognised in profit or loss.

IV Fair value of financial instruments

In determining the fair value of its financial instruments, the Company uses a variety of methods and assumptions that are based on market conditions and risks existing at each reporting date. The methods used to determine fair value include discounted cash flow analysis, available quoted market prices and dealer quotes. All methods of assessing fair value result in general approximation of value, and such value may never actually be realized.

V Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the balance sheet when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

2.7 Impairment

1 Financial assets

The Company recognizes loss allowances using the expected credit loss (ECL) model for the financial assets which are not fair valued through profit or loss. Loss allowance for trade receivables with no significant financing component is measured at an amount equal to lifetime ECL. For all other financial assets, expected credit losses are measured at an amount equal to the 12-month ECL, unless there has been a significant increase in credit risk from initial recognition in which case those are measured at lifetime ECL. The amount of expected credit losses (or reversal) that is required to adjust the loss allowance at the reporting date to the amount that is required to be recognised is recognized as an impairment gain or loss in profit or loss.

II Non-financial assets

a Intangible assets and Property, plant and equipment

The Companies non-financial assets, other than inventories and deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. Goodwill is tested annually for impairment.

For impairment testing, assets that do not generate independent cash inflows are grouped together into cash-generating units (CGUs). Each CGU represents the smallest group of assets that generates cash inflows that are largely independent of the cash inflows of other assets or CGUs.

Goodwill arising from a business combination is allocated to CGUs or groups of CGUs that are expected to benefit from the synergies of the combination.

The recoverable amount of a CGU (or an individual asset) is the higher of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the CGU (or the asset).

The goodwill impairment test is performed at the level of the cash-generating unit or groups of cash-generating units which are benefitting from the synergies of the acquisition and which represents the lowest level at which goodwill is monitored for internal management purposes. Market related information and estimates are used to determine the recoverable amount. Key assumptions on which management has based its determination of recoverable amount include estimated long term growth rates, discount rates and terminal growth rates. Cash flow projections take into account past experience and represent management's best estimate about future developments.

An impairment loss is recognised if the carrying amount of an asset or CGU exceeds its estimated recoverable amount. Impairment losses are recognised in the statement of profit and loss. Impairment loss recognised in respect of a CGU is allocated first to reduce the carrying amount of any goodwill allocated to the CGU, and then to reduce the carrying amounts of the other assets of the CGU (or group of CGUs) on a pro rata basis.

An impairment loss in respect of goodwill is not subsequently reversed. In respect of other assets for which impairment loss has been recognised in prior periods, the Company reviews at each reporting date whether there is any indication that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. Such a reversal is made only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

2.8 Provisions

A provision is recognized when the Company has a present obligation (legal / constructive) as a result of past events and it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

Bhargava

NPA

2.9 Foreign currency transactions and translations

Foreign currency transactions are recorded at rates of exchange prevailing on the date of transaction. Monetary assets and liabilities denominated in foreign currencies as at the balance sheet date are translated at the rate of exchange prevailing at the year-end. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Transaction gains or losses realized upon settlement of foreign currency transactions are included in determining net profit for the period in which the transaction is settled. Revenue, expense and cash-flow items denominated in foreign currencies are translated into the relevant functional currencies using the exchange rate in effect on the date of the transaction.

2.10 Earnings per share

Basic earnings per share is computed by dividing the net profit attributable to the equity holders of the Company by the weighted average number of equity shares outstanding during the year.

Diluted earnings per share is computed by dividing the net profit attributable to the equity holders of the Company by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. the average market value of the outstanding equity shares). Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each year presented.

2.11 Taxation

Income tax expense recognised in statement of profit and loss comprised the sum of deferred tax and current tax except the ones recognised in other comprehensive income or directly in equity.

Current Tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax reflects the best estimate of the tax amount expected to be paid or received after considering the uncertainty, if any, related to income taxes. It is measured using tax rates (and tax laws) enacted or substantively enacted by the reporting date.

Current tax assets and current tax liabilities are offset only if there is a legally enforceable right to set off the recognised amounts, and it is intended to realise the asset and settle the liability on a net basis or simultaneously.

Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the corresponding amounts used for taxation purposes. Deferred tax is also recognised in respect of carried forward tax losses and tax credits. Deferred tax is not recognised for:

- temporary differences arising on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss at the time of the transaction;
- temporary differences related to investments in subsidiaries, associates and joint arrangements to the extent that the Company is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future; and
- taxable temporary differences arising on the initial recognition of goodwill.

Deferred tax assets are recognised to the extent that it is probable that future taxable profits will be available against which they can be used. The existence of unused tax losses is strong evidence that future taxable profit may not be available. Therefore, in case of a history of recent losses, the Company recognises a deferred tax asset only to the extent that it has sufficient taxable temporary differences or there is convincing other evidence that sufficient taxable profit will be available against which such deferred tax asset can be realised. Deferred tax assets - unrecognised or recognised, are reviewed at each reporting date and are recognised/ reduced to the extent that it is probable/ no longer probable respectively that the related tax benefit will be realised.

Deferred tax is measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on the laws that have been enacted or substantively enacted by the reporting date.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

2.12 Employee benefits

Employee benefits include wages and salaries, provident fund, employee state insurance scheme, gratuity fund and compensated absences.

Defined Contribution Plans

Contributions to defined contribution plans are recognised as an expense when employees have rendered service entitling them to the contributions.

Defined Benefit Plans

For defined benefit retirement plans, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. Re-measurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding net interest), is reflected immediately in the Balance Sheet with a charge or credit recognised in other comprehensive income in the period in which they occur. The re-measurements of the net defined benefit liability are recognised directly in the other comprehensive income in the period in which they arise. Past service cost is recognised in the Statement of Profit and Loss in the period of a plan amendment. Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset. Defined benefit costs are categorised as follows:

- a. service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements);
- b. net interest expense or income; and
- c. re-measurement

The retirement benefit obligation recognised in the balance sheet represents the actual deficit or surplus in the Company's defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.

The company is provides the following as defined benefits plan as -

a Gratuity

The Company provides for gratuity, a defined benefit retirement plan ('the Gratuity Plan') covering eligible employees. The Gratuity Plan provides a lump-sum payment to vested employees at retirement, death, incapacitation or termination of employment, of an amount based on the respective employee's salary and the tenure of employment with the Company.

Liabilities with regard to the Gratuity Plan are determined by actuarial valuation, performed by an independent actuary, at each balance sheet date using the projected unit credit method. The Company recognizes the net obligation of a defined benefit plan in its balance sheet as an asset or liability. Gains and losses through re-measurements of the net defined benefit liability/(asset) are recognized in other comprehensive income. The actual return of the portfolio of plan assets, in excess of the yields computed by applying the discount rate used to measure the defined benefit obligation is recognized other comprehensive income. The effect of any plan amendments are recognized in net profits in the statement of Profit and Loss.

b Short term employee benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided. A liability is recognised for the amount expected to be paid e.g., under Payable to employee, if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee, and the amount of obligation can be estimated reliably.

c Provident fund

Eligible employees of the Company receive benefits from a provident fund, which is a defined benefit plan. Both the eligible employee and the Company make monthly contributions to the provident fund plan equal to a specified percentage of the covered employee's salary. The Company's contribution is recognized as an expense in the statement of profit and loss during the period in which the employee renders the related services.

d Compensated absences

The Company has a policy on compensated absences which are non-accumulating in nature. Expense on non-accumulating compensated absences is recognized in the period in which the absences occur.

2.13 Inventories

Inventories are valued at the lower of cost and estimated net realizable value (net of allowances) after providing for obsolescence and other losses, where considered necessary. The cost of inventories is based on the weighted average method, and includes expenditure incurred in acquiring the inventories, production or conversion costs and other costs incurred in bringing them to their present location and condition. The cost comprises cost of purchase, cost of conversion and other costs including appropriate production overheads in the case of finished goods and work in progress, incurred in bringing such inventories to their present location and condition. Trade discounts or rebates are deducted in determining the costs of purchase. Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

2.14 Cash Flow Statement

Cash flows are reported using the indirect method, whereby profit for the period is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Company are segregated.

2.15 Other income

Other income is comprised primarily of interest income, exchange gain/loss on translation of other assets and liabilities. Interest income is recognized using the effective interest method.

2.16 Leases

The Company evaluates if an arrangement qualifies to be a lease as per the requirements of Ind AS 116. Identification of a lease requires significant judgment. The Company uses significant judgement in assessing the lease term (including anticipated renewals) and the applicable discount rate.

The Company determines the lease term as the non-cancellable period of a lease, together with both periods covered by an option to extend the lease if the Company is reasonably certain to exercise that option, and periods covered by an option to terminate the lease if the Company is reasonably certain not to exercise that option in assessing whether the Company is reasonably certain to exercise an option to extend a lease, or not to exercise an option to terminate a lease, it considers all relevant facts and circumstances that create an economic incentive for the Company to exercise the option to extend the lease, or not to exercise the option to terminate the lease. The Company revises the lease term if there is a change in the non-cancellable period of a lease.

Company as a lessee

The Company's lease asset classes primarily consist of leases for Building. The Company assesses whether a contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether: (i) the contract involves the use of an identified asset (ii) the Company has substantially all of the economic benefits from use of the asset through the period of the lease and (iii) the Company has the right to direct the use of the asset.

At the date of commencement of the lease, the Company recognizes a right-of-use asset ("ROU") and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

Short-term leases and leases of low value assets

The Company applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases that are considered to be low value. Lease payments on short-term leases and leases of low-value assets are recognised as expense on a straight-line basis over the lease term.

Where the Company is the lessor

Leases in which the Company does not transfer substantially all the risks and rewards of ownership of an asset is classified as an operating lease. Assets subject to operating leases are included in the property, plant and equipment. Rental income on an operating lease is recognised in the statement of profit and loss on a straight-line basis over the lease term. Costs, including depreciation, are recognised as an expense in the statement of profit and loss.

Bharat

NJA

Mush Textile Private Limited**Notes forming part of the financial statements for the year ended March 31, 2026***(All amounts in INR Millions, unless otherwise stated)***Balance sheet:**

For leases that have been classified to date as operating leases in accordance with Ind AS 116, the lease liability will be recognised at the present value of the remaining lease payments, discounted at 14% per annum. The right-of-use asset will generally be measured at the amount of the lease liability adjusted for advance payments and accrued liabilities from the previous financial year.

Cash Flow Statement:

The change in presentation of operating lease expenses will result in a corresponding improvement in cash flows from operating activities and a decline in cash flows from financing activities.

2.17 Cash and cash equivalents

Cash comprises cash on hand and balances with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term balances, as defined above. The cash flow statement is prepared using indirect method.

2.18 Rounding off amounts

All amounts disclosed in the financial statements and notes have been rounded off to the nearest Millions as per the requirements of Schedule III of the Act unless otherwise stated.

2.19 Contingent liabilities and contingent assets

A contingent liability exists when there is a possible but not probable obligation, or a present obligation that may, but probably will not, require an outflow of resources, or a present obligation whose amount can not be estimated reliably. Contingent liabilities do not warrant provisions, but are disclosed unless the possibility of outflow of resources is remote.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity. Contingent assets are not recognized in the restated consolidated financial statements. However, contingent assets are assessed continually and if it is virtually certain that an inflow of economic benefit will arise, the asset and related income are recognized in the period in which the change occurs. A contingent asset is disclosed, where an inflow of economic benefits is probable.

2.20 Segment Reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. The board of directors of the Company are identified as Chief Operating decision maker. Refer note 41 for segment information.

2.21 Recent pronouncements

Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time.

During the year, MCA has issued certain amendments to the existing Indian Accounting Standards (Ind AS). The Company has evaluated the impact of these amendments on its financial statements. For details of the amendments and their expected impact on the Company, refer Note No. B40.

The Company does not expect any material impact on its financial statements from the adoption of these amendments, except for additional disclosure requirements, where applicable.

Deferred tax assets have not been recognised in respect of the losses, unabsorbed depreciation and deductible temporary differences, since, the Company has been loss making from some time, and there are no other tax planning opportunities or other evidence of recoverability in the near future. If the Company were able to recognise all unrecognised deferred tax assets, equity would have increased as at March 31, 2026 by Nil (previous year by INR 0.69 Million).

Expiry Profile of unused tax losses:

The Company has unabsorbed depreciation for March 31, 2026 of INR 0.17 Million (March 31, 2025 INR 0.17 Million) that are available for off-Setting for indefinite life against future taxable profits of the company.

*During the year, the Company recognized an expense of Rs Nil (previous year: Rs 12.36 million) in relation to clawback of compensation from the erstwhile promoters as part of the terms of the business combination. This clawback was executed by the Parent Company as part of the overall acquisition structure and was not recharged to the Company. In line with the accounting treatment, the corresponding credit has been recognized as a deemed equity contribution from the Parent Company, reflecting the capital nature of the transaction. This has been presented under “Other Equity” in the statement of changes in equity.

B25 Earning per share (EPS)

The Company's Earnings per Share ("EPS") is determined based on the net profit attributable to the shareholders of the company. Basic earnings per share is computed using the weighted average number of shares outstanding during the year.

For the purpose of calculating diluted earnings per share, the net profit for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period is adjusted for the effects of all dilutive potential equity shares.

Mush Textile Private Limited**Notes forming part of the financial statements for the year ended March 31, 2026***(All amounts in INR Millions, unless otherwise stated)***B26 Leases****As a Lessee**

The Company's significant leasing arrangements are in respect of operating leases for stores building with the exception of short term leases and leases of low-value underlying assets, each class is reflected on the balance sheet as right of use and lease liability. The arrangements generally range between three year to five years. The lease arrangement has extension / termination option exercisable by either party which may make the assessment of lease term uncertain. While determining the lease term, the management considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option.

Investment	0.04	-	-	0.04	0.04
Other financial assets	-	1.07	-	1.07	1.07
Total	0.04	22.15	-	22.19	22.19
Financial liabilities					
Borrowings					
- Long term	-	-	-	-	-
- Short term	-	18.04	-	18.04	18.04
Trade payable	-	6.73	-	6.73	6.73
Other financial liabilities	-	9.82	-	9.82	9.82
Total	-	34.59	-	34.59	34.59

Mush Textile Private Limited
Notes forming part of the financial statements for the year ended March 31, 2026
(All amounts in INR Millions, unless otherwise stated)

March 31, 2025					
Particulars	FVTPL	Amortised cost	FVOCI	Total carrying value	Fair value
Financial assets					
Trade receivables	-	17.14	-	17.14	17.14
Cash and cash equivalents	-	1.35	-	1.35	1.35
Investment	0.05	-	-	0.05	0.05
Other financial assets	-	0.12	-	0.12	0.12
Total	0.05	18.61	-	18.66	18.66
Financial liabilities					
Borrowings					
- Long term	-	-	-	-	-
- Short term	-	15.90	-	15.90	15.90
Trade payable	-	8.05	-	8.05	8.05
Other financial liabilities	-	6.00	-	6.00	6.00
Total	-	29.95	-	29.95	29.95

The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

The Company has disclosed financial instruments such as cash and cash equivalents, other bank balances, trade receivables, trade payables at carrying value because their carrying amounts are a reasonable approximation of the fair values due to their short-term nature.

b. Fair value hierarchy

The table shown below analyses financial instruments carried at fair value, by valuation method. The different levels have been defined below:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The following table shows the Levels within the hierarchy of financial and non-financial assets and liabilities measured at fair value on a recurring basis at March 31, 2026 and March 31, 2025 -

Quantitative disclosures fair value measurement hierarchy for assets as at March 31, 2026:

Particulars	Date of valuation	Total	Fair value measure using		
			Quoted prices in active markets (Level 1)	Significant observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Assets measured at fair value:					
FVTPL financial investments					
Quoted equity shares	31-Mar-26	0.04	0.04	-	-

Quantitative disclosures fair value measurement hierarchy for assets as at March 31, 2025:

Particulars	Date of valuation	Total	Fair value measure using		
			Quoted prices in active markets (Level 1)	Significant observable inputs (Level 2)	Significant unobservable inputs (Level 3)
Assets measured at fair value:					
FVTPL financial investments					
Quoted equity shares	31-Mar-25	0.05	0.05	-	-

There have been no transfers between Level 1 and Level 2 during the current financial year

Assets and liabilities measured at fair value:

Fair value of investment in quoted financial instruments are derived from quoted market price in active market.

Other financial assets and liabilities

i) Cash and cash equivalents, other bank balances, trade receivables, trade payables at carrying value because their carrying amounts are a reasonable approximation of the fair values due to their short-term nature.

ii) Loans have fair values that approximate to their carrying amounts as it is based on the net present value of the anticipated future cash flows using rates currently available for debt on similar terms, credit risk and remaining maturities.

iii) All financial assets and financial liabilities are classified as Level-3 Fair Value hierarchy due to the use unobservable inputs, including own credit risk.

There have been no transfers between Level 1 and Level 2 during the current financial year.

Bhargava

B28 Financial risk, Market risk, Interest rate, Foreign currency management objectives and policies**Risk management objectives and policies**

The Company is exposed to various risks in relation to financial instruments. The main types of risks are market risk, credit risk and liquidity risk. The Company's activities expose it to liquidity risk and credit risk. This note explains the sources of risk which the entity is exposed to and how the entity manages the risk and the related impact in the financial statements.

Risk	Credit risk	Liquidity risk
Exposure arising from	Cash and cash equivalents, trade receivables, financial assets measured at amortised cost	Borrowings, trade payables and other financial liabilities
Measurement	Aging analysis	Rolling cash flow
Management	Bank deposits, diversification of asset base and credit limits	Availability of sources of funds

a. Credit risk

Credit risk arises from cash and cash equivalents, trade receivables, deposits with banks and financial institutions and other financial assets.

Credit risk exposure**Provision for expected credit losses**

In respect to other financial assets, the Company follows a 12-months expected credit loss approach. The Company's management does not foresee a material loss on account of credit risk due to the nature and credit worthiness of these financial assets. Further, the Company has not observed any material defaults in recovering such financial assets. Therefore, the Company has not provided for any expected credit loss on these financial assets except for trade receivables.

March 31, 2026				
Particulars	Estimated gross carrying amount at default	Expected probability of default	Expected credit losses	Carrying amount net of impairment provision
Cash and cash equivalents	2.68	0.00%	-	2.68
Trade and other receivables	18.86	2.44%	0.46	18.40
Investment	0.04	0.00%	-	0.04
Other financial assets	1.07	0.00%	-	1.07

March 31, 2025				
Particulars	Estimated gross carrying amount at default	Expected probability of default	Expected credit losses	Carrying amount net of impairment provision
Cash and cash equivalents	1.35	0.00%	-	1.35
Trade and other receivables	17.88	4.16%	0.74	17.14
Investment	0.05	0.00%	-	0.05
Other financial assets	0.12	0.00%	-	0.12

Expected credit loss for trade receivables under simplified approach

The Company has certain trade receivables that have not been settled by the contractual due date but are not considered to be impaired. The amounts analysed by the length of time past due, are:

March 31, 2026				
Particulars	Estimated gross carrying amount at default	Expected probability of default	Expected credit losses	Carrying amount net of impairment provision
Not due	-	0.00%	-	-
Not more than 6 months	17.77	0.11%	0.02	17.75
More than 6 months	1.09	40.25%	0.44	0.65
Total	18.86		0.46	18.40

March 31, 2025				
Particulars	Estimated gross carrying amount at default	Expected probability of default	Expected credit losses	Carrying amount net of impairment provision
Not due	-	0.00%	-	-
Not more than 6 months	17.15	0.47%	0.08	17.07
More than 6 months	0.74	89.19%	0.66	0.08
Total	17.89		0.74	17.14

In respect of trade and other receivables, the Company is exposed to significant credit exposure to a group of counterparties having similar characteristics. Based on historical information about customer default rates, management consider the credit quality of trade receivables that are not past due to be good.

Bhargava

Mush Textile Private Limited**Notes forming part of the financial statements for the year ended March 31, 2026***(All amounts in INR Millions, unless otherwise stated)*

The credit risk for cash and cash equivalents is considered negligible, since the counterparties are reputable banks with high quality external credit ratings.

Other financial assets dues from several counter parties and based on historical information about defaults from the counter parties, management considers the quality of such assets that are not past due to be good.

b. Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due. Due to the nature of the business, the Company maintains flexibility in funding by maintaining availability under committed facilities.

Management monitors rolling forecasts of the Company's liquidity position and cash and cash equivalents on the basis of expected cash flows. The Company takes into account the liquidity of the market in which the entity operates. In addition, the Company's liquidity management policy involves projecting cash flows in major currencies and considering the level of liquid assets necessary to meet these, monitoring balance sheet liquidity ratios against internal and external regulatory requirements and maintaining debt financing plans.

Maturities of financial liabilities

The tables below analyse the Company's financial liabilities into relevant maturity groupings based on their contractual maturities for all non-derivative financial liabilities, and

The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

March 31, 2026					
Particulars	Carrying Amount	Less than 1 year	1 – 3 year	Above 3 years	Total
Borrowings	18.04	18.04	-	-	18.04
Trade payable	6.73	6.73	-	-	6.73
Other financial liabilities	9.82	9.82	-	-	9.82
Total	34.59	34.59	-	-	34.59

March 31, 2025					
Particulars	Carrying Amount	Less than 1 year	1 – 3 year	Above 3 years	Total
Borrowings	15.90	15.90	-	-	15.90
Trade payable	8.05	8.05	-	-	8.05
Other financial liabilities	6.00	6.00	-	-	6.00
Total	29.95	29.95	-	-	29.95

c) Market risk

Market risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises two types of risk namely: currency risk and interest rate risk. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

d) Interest rate risk

Interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's borrowings with floating interest rates.

Exposure to interest rate risk

The Company's interest rate risk arises majorly from the term loan carrying floating rate of interest. These obligations exposes the Company to cash flow interest rate risk. The exposure of the Company's borrowing to interest rate changes as reported to the management at the end of the reporting period are as follows:

	As at March 31, 2026	As at March 31, 2025
Fixed rate liabilities		
Borrowings	18.04	15.90
	18.04	15.90
Effect of interest rate swaps		
Total	18.04	15.90

Bhargava

Mush Textile Private Limited**Notes forming part of the financial statements for the year ended March 31, 2026***(All amounts in INR Millions, unless otherwise stated)***B29 Capital management policies and procedures**

The Company's capital management objectives are to ensure the Company's ability to continue as a going concern as well as to provide a balance between financial flexibility and balance sheet efficiency. In determining its capital structure, Company considers the robustness of future cash flows, potential funding requirements for growth opportunities and acquisitions, the cost of capital and ease of access to funding sources.

Management assesses the Company's capital requirements in order to maintain an efficient overall financing structure while avoiding excessive leverage. This takes into account the subordination levels of the Company's various classes of debt. The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares, or sell assets to reduce debt.

The amounts managed as capital by the Company for the reporting year under review are summarized as follows :

Particulars	As at March 31, 2026	As at March 31, 2025
Total borrowings	18.04	15.90
Less: Cash and cash equivalents	2.68	1.35

B31 Disclosures under Micro Small and Medium Enterprise Development Act, 2006

Particulars	As at March 31, 2026	As at March 31, 2025
a) The principal amount and the interest due thereon (to be shown separately) remaining unpaid to any supplier as at the end of each accounting year. Interest amount is Nil (P.Y. Nil)	5.50	6.88
b) The amount of interest paid by the buyer in terms of Section 16 of the Micro Small and Medium Enterprise Development Act, 2006, along with the amounts of the payment made to the supplier beyond the appointed day during each accounting year.	-	-
c) The amount of interest due and payable for the period of delay in making payment (which have been but beyond the appointed day during the year) but without adding the interest specified under Micro Small and Medium Enterprise Development Act, 2006.	-	-
d) The amount of interest accrued and remaining unpaid at the end of each accounting year.	-	-
e) The amount of further interest remaining due and payable even in the succeeding years, until such date When the interest dues as above are actually paid to the small enterprise for the purpose of disallowance As a deductible expenditure under section 23 of the Micro Small and Medium Enterprise Development Act, 2006.	-	-

The ministry of Micro, Small and Medium enterprises has issued an stores memorandum dated 26/08/2008 which recommends that the Micro and Small Enterprises should mention in their correspondence with its customers the Entrepreneurs Memorandum Number as allocated after filing of the Memorandum. Based on the information available with the management, there are no over dues outstanding to micro and small enterprises as defined under the Micro, Small and Medium Enterprises Development Act, 2006. Further, the Company has not received any claim for interest from any supplier under the said act.

B32 Employee benefit obligations**Disclosure of gratuity (non-funded)**

The Company provides for gratuity for employees in India as per the Payment of Gratuity Act, 1972. Employees who are in continuous service for a period of 5 years are eligible for gratuity. The amount of gratuity payable on retirement/termination is the employees last drawn basic salary per month computed proportionately for 15 days salary multiplied for the number of years of service.

These defined benefit plans expose the group to actuarial risk, such as Investment risk, longevity risk and salary risk

Investment risk - The present value of the defined benefit plan liability is calculated using a discount rate which is determined by reference to market yields at the end of the reporting period on government bonds.

Interest risk - A decrease In the bond interest rate will increase the plan liability.

longevity risk - The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and alter their employment. An increase in the life expectancy of the plan participants will increase the plan's liability.

Salary risk-The present value of the defined benefit plan liability is calculated by reference to the future salaries of plan participants. As such,an increase In the salary of the plan participants will increase the plan's liability.

Description	As at March 31, 2026	As at March 31, 2025

Return on Capital Employed (%)	0.20	(0.39)	-151%	Due to increase in profit during the year.
Return on Investment	(0.23)	(0.19)	25%	-

Detailed explanation of ratios**Current Ratio**

The Current Ratio is a liquidity ratio that measures a Company's ability to pay short-term obligations or those due within one year. It is calculated by dividing the current assets by current liabilities.

Debt Equity Ratio

The ratio is used to evaluate a Company's financial leverage. It is a measure of the degree to which a Company is financing its operations through debt versus wholly owned funds. It is calculated by dividing a Company's total debt by its shareholder's equity. Debt excludes lease liabilities.

Debt service coverage ratio

The Debt Service Coverage Ratio (DSCR) measures the ability of a Company to use its operating income to repay all its debt obligations, including repayment of principal and interest on both short-term and long-term debt. It is calculated by dividing the earnings before interest, tax and depreciation by interest payment plus principal repayment of debt.

Return on Equity

Return on Equity (RoE) is a measure of profitability of a Company expressed in percentage. It is calculated by dividing profit/loss after tax for the period by average Equity funds employed during the period.

Inventory Turnover ratio

Inventory Turnover is the number of times a Company sells and replaces its inventory during a period. It is calculated by dividing turnover by average inventory.

Signature

Signature

Trade Receivables Turnover ratio

The above ratio is used to quantify a Company's effectiveness in collecting its receivables or money owed by customers. The ratio shows how well a Company uses and manages the credit it extends to customers and how quickly that short-term debt is collected or is paid. It is calculated by dividing Net Credit sales by average trade receivables.

Trade Payables Turnover ratio

The accounts payable turnover ratio shows investors how many times per period a Company pays its accounts payable. In other words, the ratio measures the speed at which a Company pays its suppliers. It is calculated by dividing net credit purchases including other expenses by average trade payables.

Net Capital Turnover ratio

It measures the entity's ability to generate sales per rupee of long-term investment. A higher ratio indicates better utilization of long-term funds of owners and the lenders. It is calculated by dividing turnover by Working capital.

Net Profit Margin (%)

The net profit margin is equal to how much net income or profit is generated as a percentage of total income. It is calculated by dividing the profit for the year by total income.

Return on Capital Employed

Return on Capital Employed (RoCE) is a financial ratio that measures a Company's profitability and the efficiency with which its capital is used. In other words, the ratio measures how well a Company is generating profits from its capital. It is calculated by dividing profit before exceptional items, Finance cost and tax by capital employed during the period.

Return on Investment

Return on investment (ROI) is a financial ratio used to calculate the benefit an investor will receive in relation to their investment cost. It is most commonly measured as net income divided by the original capital cost of the investment. The higher the ratio, the greater the benefit earned.

B36 Recent pronouncements

Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time.

I. Ind AS 1 (Presentation of Financial Statements): Classification of Liabilities: Clarifies that liabilities are classified as current/non-current based on rights existing at the reporting date, replacing "unconditional right" with "substantive right" to defer settlement.

Covenants: Enhanced disclosures are required for covenants that must be met within 12 months, specifically how entities manage the risk of breaching those covenants.

The amendment also introduces guidance on classification of liabilities with covenants. The Company has no impact of these amendments in its classification criteria of current and non-current liabilities.

II. Ind AS 7 & Ind AS 107 (Cash Flows & Financial Instruments): Supplier Finance Arrangements: Companies must provide detailed disclosures on supplier finance arrangements (reverse factoring), including terms, outstanding balances, and liquidity risk, to improve transparency.

The Company has reviewed the new pronouncements and based on its evaluation has determined that it does not have any impact in its financial statements

III. Ind AS 12 (Income Taxes - Pillar Two): Global Minimum Tax: Introduces a temporary exception to deferred tax accounting related to Pillar Two model rules. It requires new disclosures about exposure to this tax, which treats top-up taxes as current tax expenses

The Company has reviewed the new pronouncements and based on its evaluation has determined that it does not have any impact in its financial statements

IV. Ind AS 21 (Effects of Changes in Foreign Exchange Rates): Lack of Exchangeability: Provides guidance on assessing when a currency is exchangeable and how to determine the spot rate when it is not.

The Company has reviewed the new pronouncements and based on its evaluation has determined that it does not have any impact in its financial statements.

B37 The Code on Social Security, 2020 ('Code') relating to employee benefits during employment and post-employment benefits received Presidential assent in September 2020. The Code has been published in the Gazette of India. However, the date on which the Code will come into effect has not been notified. The Company will assess the impact of the Code when it comes into effect and will record any related impact in the period when the Code becomes effective.

B38 Previous Year's Figures

Previous year figures have been audited by a firm of Chartered Accountants other than Bansal & Co. LLP.
