WIDAL TEST

ANTIBODY TITRE	1/30	1/60	1/120	1/240	1/480
S.TYPHI 'TO'	+ve	+ve	+ve	-ve	-ve
S.TYPHI 'TH'	+ve	-ve	-ve	-ve	-ve
S.PARA TYPHI 'AH'	-ve	-ve	-ve	-ve	-ve
S.PARA TYPHI 'BH'	-ve	-ve	-ve	-ve	-ve

RESULT : Significant Titre

COMMENTS :

1. In enteric fever specific agglutinins are usually detectable after at least 7 days of fever.
2. Sera from normal individuals may show agglutinin in titres of 1:60. Titres of 1:120 or more are significant.
3. A single positive result has less significance than a rising agglutinin titre.
4. A rise in the titre of all three 'H' agglutinin is suggestive of recent TAB vaccination.
